

K12

Programs

The ICoMusic Foundations main programs are for K12 students.

We provide deserving underprivileged young people with musical instruments, Master Classes, a small Concert Studio venue where students can give recitals and we video the recitals and provide the student with a thumb drive of their performance for the to study at no cost to them, their parents or guardians. We believe music is very important in the development of young minds, emotions and self esteem, and it should not be denied to them because they cannot afford the instrument or studies.

Program A: We provide young people that have already played an instrument, have shown a real interest in playing that instrument but cannot afford an instrument of their own.

Program B: We work directly with young people and other nonprofits that teach to help get the young people playing and instrument. Basically beginners: we start with recorders.

Program C: We provide educational Master Classes, videos, and small groups for local Muncie students to help with their education.

Program D: In our advanced program for exceptional K12 young people we provide them with professional instruments.

*Due to the high cost of professional instruments this is a very LIMITED program.
